

Course Outcomes (COs)

21ELN14 Basics Electronics and Communication		
C114.1	Discuss the concept of power supplies ,amplifiers, oscillators .	K2
C114.2	Describe basics of logic gates , microcontroller system and shift registers	K3
C114.3	Analyze the concepts of embedded systems , sensors, actuators , UART interfacing[K3
C114.4	Discuss the concepts of analog and digital communication	K2
C114.5	Describe the fundamentals of cellular wireless network , wireless network topologies and basics of communication system.	K3
